## WANT MEAT INSPECTOR FOR THE DOMINION

Calgarians Will Make Representations To The Province  
And Dominion. Vancouver Of Same Mind

Calgary, Alta., June 25—Dr. Macdonald, health officer of the city of Calgary, has been urging the city to make representations to the province or Dominion to appoint an inspector of meat, who will have authority to investigate conditions at slaughter houses and abattoirs and such like.

At the present time the department of health has no authority over the source of the meat supply. They can look over the meat stores in the city and see that all is in good condition, but not over the abattoirs outside of the city.

The health department has authority to inspect the milk supply of the city and to investigate conditions at the milk houses.

The suggestion of general inspection is not inspired by any suspicion that conditions are not satisfactory, but more because the inspection should be made as a safeguard and because at the present time the people demand it.

The Vancouver Province refers to the agitation going on there for more rigid meat inspection.

The medical health officer man interviewed said: "At the Burns establishment a representative of the city will be fully occupied all the time, as it will be the principal slaughter house in the city. Every carcass will be stamped, thus insuring the quality of the meat supply. The same system will be carried out

with the other butchers. If any of them locate outside of the city limits I will insist that the live stock as well as the dressed meat shall be inspected if it is intended for sale in Vancouver.

### WILL RECOGNIZE HEROISM.

Calgary, June 24—An effort is to be made to have the heroic work of Mrs. Bond, of Colheima, recognized. Further details of the tragedy occurring in the Red Deer river indicate most heroic conduct on her part. The two women and little girl were fording the Little Red Deer river, when water swept the wagon box away. Mrs. Bond clung to the box, and, though her own position was one of extreme peril, she started to rescue the other woman. She got her into the wagon box, and the two floated down stream two miles before Mrs. Bond could wade to the shore. When she did it was to find that Mrs. Lamarch, the rescued woman, was dead.

### ARGOS PROBABLE WINNERS.

London, June 24—The Tribune says: "Without doubt the Argonauts are the best combination that ever crossed the Atlantic after the Grand Challenge cup. Their new Clasper craft is lighter than anything they have used before, but, barring mishaps, the crew will be in fine shape by July 1. The Argos will probably be the first colonial or foreign crew to win the cup."

## THE RUSSIAN NIGHTMARE

Wild Saturnalia Of Crime, Lust And  
Blood In The Dark Interior Of  
The Gloomy Czar's Domain

St. Petersburg, June 27—Rioting continues throughout Russia. The most terrible news comes from Bessarabia, where the conditions are declared appalling. Inhabitants of all towns and villages are attacking and wrecking Jews' quarters. Women are being outraged before being killed and men and children are being terribly tortured and then murdered. Ten of the most prominent Jews in Slatitz were torn limb from limb, while forty others were so terribly injured that their lives are despaired of.

At Boly many were shot dead and numerous instances of appalling indignities to women are reported. At Kishineff three Jews, prominent in organizing the Jewish band, have been assassinated.

It is stated that the casualties on a Khanikowsky street Tuesday when strikers from the Nicholas railway were charged by Cossacks, number eighty, of whom ten are expected to die. Parties were marching along the streets singing a revolutionary song, but doing no particular harm, when the commandant of the Cossacks ordered them to disperse. Their reply was a volley of stones that injured some soldiers. The Cossacks then charged with swords. Among the injured is an officer in command of the Cossacks. His skull was fractured.

### RAILWAY BILLS PASSED

Ottawa, June 26—There was a long discussion tonight on the telephone clause of Edmonton's railway bill, after which it was passed. The clause added provided that local companies, by application to the railway commissioner, can secure connection with trunk lines for long distance service. The clause placing express companies under the jurisdiction of the railway commission, was also passed. All railway subsidies were adopted as submitted to the House, covering 2,385 miles altogether. There were forty-three resolutions in all, representing on a basis of the minimum allowance of \$3,200 per mile, a total of \$9,320,000. Among the western subsidies are the Northern railway company, eighty miles; Western Alberta Company, from the boundary north-westward towards Anahric; fifty miles in a line from Toulon to Icelandic river, thirty-five miles the Kootenay Central from Golden to the boundary, via Windermere and Port Steele, crossing the Crow's Nest Pass railway, near Elk, 186 miles; the Kettle River Valley from Grand Forks up the North Portal, fifty miles.

### CANADIAN POET DEAD.

Toronto, June 27—Alexander Muir, the composer of the most popular Canadian song, "The Maple Leaf Forever," died at his home in this city yesterday at the age of seventy-three. Mr. Muir served for years as principal of one of the city's public schools. He was a genial, warm-hearted Scotchman and counted among his friends the most distinguished and honored among Canadians. On the occasion of the Prince of Wales' visit to Toronto in 1901 Mr. Muir and the Prince planted a maple tree in Queen's park.

## PAY VISIT TO TERMINUS

Edmonton Men Visit Scene Of G.T.P.  
Activity On Pacific Coast. Harbor  
Being Surveyed

Messrs. Storie and Richardson, brokers, of the city, returned last evening from a three-week's trip to Vancouver, Victoria and Karen Island, the terminus of the Grand Trunk Pacific. To the Bulletin today Mr. Storie gave a short account of their trip. They took the steamer from Vancouver and went north to Port Essington, at the mouth of the Skeena. From there they went further north to Port Simpson, which is about 600 miles north of Vancouver. Half way between Port Essington and Port Simpson is Karen Island. Mr. Stone said they were unable to make a landing on the island, and did not stop there, passing the island on the outer side. He says that the government is at work surveying for a harbor between the island and Wattakella, on the mainland. Mr. Storie thinks that the island will be an ideal place for a terminus and is a good site for a large city. Although the G. T. P. surveyors have not yet reached the western slope of the mountains, investors are already becoming interested in the island. The important industry in that district is the fishing. Near the mouth of the Skeena are thirteen canneries, employing a large number of Indians, Chinese and Japanese. The island also will be an important fishing point. Port Simpson, Mr. Storie says, is only a small settlement, and the town is in the midst of a bog. The people of Vancouver are talking a great deal of the project of the C. P. R. to bring their steamers from the Pacific into Esquimalt, and bring them over Vancouver Island, taking them to the mainland on flat boats, thereby cutting short the present route to Vancouver considerably. Ladysmith, north of Victoria, is also a lively centre, and an important coaling station, the C. P. R. owning large coal mines there. There is also a smelter.

### TWEEDIE AND PUGSLEY MAY QUIT.

St. John, N.B., June 26—Many rumors of early changes in the provincial government are being circulated. It seems to be the opinion that the premier, Hon. L. J. Tweedie, will retire from active politics before an appeal is again made to the electors. Another rumor is that Hon. Wm. Pugsley, attorney general, will also retire at an early date, perhaps before the next session of the legislature. Mr. Pugsley is understood to have been advised by his physicians to take a rest.

## MUCK RAKE IN EDMONTON

City Has Packing House Case Of Its  
Own. Williamson Bros. Charged  
With Keeping Unsanitary  
Premises

Information was laid yesterday by Dr. Braithwait, city health officer, against Williamson Brothers, charging them with keeping their piggery at Rat Creek in an unsanitary condition.

The case was called in the police court last night, Mr. Newell, of Beck, Emery and Newell, appearing on behalf of the health officer and the city for an enforcement of the sanitary regulations, and Mr. Biggar appearing as Williamson Bros.' counsel for the defence. No evidence was taken and the case was adjourned to Friday afternoon.

The piggery in question has frequently been petitioned against by residents in the vicinity, and the school board, the case having been before the city council twice already this year.

### ATHLETIC MEETING.

On Friday evening at nine o'clock in the Thistle rink, a general meeting of the athletic association will be held, to which all interested are invited. The business of the meeting is to form a limited liability company. Only the shareholders will be permitted to vote.

### ROBERT LEE RETURNS

Robert Lee, of the firm of Crafts & Lee, returned from British Columbia yesterday afternoon, where he went to look up some propositions at the coast. Mr. Lee was in sight of the G. T. P. terminus, at Kaimo, but did not go ashore. He reports that surveyors are working between there and Kitilaia canyon, on the Skeena, laying out the Pacific end of the road, but says that there is nothing doing yet on the townsite.

Mr. Lee states that the B. C. coast appears to be very active at the present time, especially Vancouver and that the lumber trade is humming everywhere, all the mills being away behind with their orders.

### Building Very Brisk

The building trade still continues very brisk, especially in the erection of dwellings. Preparations for the construction of the new Imperial bank are completed. The old buildings have been removed and the excavators are at work today. The following permits have been issued:

J. Y. Wells, dwelling, Groat estate, on St. James avenue, between Mackenzie and Peace; value \$2500.  
W. G. Robinson, dwelling, west side Boland street, value \$2500.  
J. W. Walker, north side of Jasper, between Queens and McDougall, value \$2200.  
J. W. Bond, dwelling east side Third street, value \$2500.  
L. D. W. Bender, dwelling west side Fifth, between Saskatchewan and Calgary avenue, value \$1800.  
Revillon Bros., north College, between Glen and Spruce street, value \$1800.  
M. C. Cornogdale Jr., dwellings, one east side of Ottawa, another west side Donald, value \$1800.

## ARCTIC INVESTIGATION CLOSED AT OTTAWA

Conservatives Discovered One Item Of High Priced Tobacco.  
All Else Merely Hints. Railway Legislation Goes  
Through

Ottawa, June 26—(Special to the Bulletin)—Premier Laurier has given notice that the house will sit on Saturdays but not on Monday next.

The report of the special committee on the Arctic investigation will be presented to parliament tomorrow. It sets forth that all provisions were put on board, that prices were reasonable and the quality good. The only instance in which too much was paid was in regard to a quantity of tobacco purchased in Quebec. With this exception, everything else was satisfactory. The Conservatives presented a minority report in which they complained of food being given to the Esquimaux; about fortnightly dances on the Arctic and various other things. The only article they singled out as being too high was the tobacco, which was also referred to in the majority report.

Hon. Charles Fitzpatrick, deputy governor general, attended senate today and gave his assent to such bills as had been passed to date. One bill which was urgently wanted was that in regard to a change in the fiscal year, but along with some

others it had not been returned from Rideau hall and therefore is not among those that have received Royal assent. Mr. Fitzpatrick appeared in frock coat and took the speaker's chair, which stands a little in front of the governor general's. This was done at his own special request, and there was no lack of dignity for all this in the way in which his duties were discharged.

Ottawa, June 24—At yesterday's cabinet meeting the report of the transcontinental railway commission recommending that the contract for 65,000 tons of steel rails be divided between the Sydney, N.S., company and the Sault Ste. Marie company, in accordance with the tenders, was approved. The price is \$34 a ton. The contract for angle bars and bolts is divided between the Nova Scotia Steel Co. and the Montreal-Hamilton companies.

### WELLMAN REACHES NORWAY

Trondhjem, Norway, June 26—Walter Wellman, leader of the Chicago Arctic expedition, arrived here today.

## You Will Stick to Our LUMBER

Once you have tried it. Because you can't get so much, so good, for so little money anywhere else. That says a lot and means more. Try us and give us an opportunity to please you. We have

## City Council Adopts

### Electric Light Rate

Money By-laws to Provide Parks, Isolation Hospital, Telephone Reconstruction and Machinery Advanced a Stage

The city council held quite a protracted meeting last night at which at least one very important and long standing question was advanced and another one almost old enough to vote was settled—respectively the money by-laws and the electric light rates. In the latter Ald. Calhoun lost out in his efforts to reduce the rates. Commissioner Kinnaird pointing out that the 9 to 12 rate was very close to the marginless minimum.

On the money by-laws it was decided that they should be submitted to the ratepayers all at once, and the date set for the 15th of August. There are four of them, the road and ditching machinery by-law, the park sites, telephone improvement and isolation hospital.

The first calls for \$11,500 for the Carson ditcher, a road making machine, and some other municipal machinery. The life of the machinery was estimated at ten years, and the debentures will consequently be 10 year debentures. The by-law passed its first reading.

The telephone by-law calls for \$65,000, of which \$30,000 is to be expended in the wiring of the city and the balance for central office equipment. The debentures will be for 40 years. This was also read a first time.

The isolation hospital by-law was laid over to get an estimate of the cost of equipment after the building had been built. It will come up Thursday evening again.

The park by-law was read but not passed as it was in blank, the figures not being put in. A motion was passed providing that the by-law should be for a sum sufficient to cover the option price at the time that the park sites were taken over by the aldermen for the city several months ago, and the interest to date. The debentures were placed at 40 years.

The understanding of the aldermen was that all the by-laws should be advanced to the advertising stage at the Thursday meeting and promulgated immediately.

The early closing by-law for shops and barber shops was put through all three readings.

In the regular order of business after the reading of the minutes a petition was presented by a large number of Jasper avenue merchants protesting against the practice of using portions of the street for building operations, especially citing the case of the Imperial Bank and memorializing the council that the time had arrived when the city should not permit the continuance of such practice. The petitioners requested that the council put an end to the practice. The petition was signed by nearly all the merchants and business men along the street, and many of them were present in the council chamber. K. W. Wickham acted as spokesman for the petitioners and read the by-law, No. 213, which contained provisions covering the case of building contractors using portions of the street. The by-law states that a permit is required from the building inspector to use any portion of the street. Mr. Mackenzie said that the building inspector had been in the habit of permitting builders to use the streets. The by-law also described the nature of a scaffold which should be built over the street in order that building could be carried on without obstructing traffic. Mr. Mackenzie suggested that the license permitting the inspector to permit to use the streets be struck out of the by-law.

Alderman Picard suggested that it might be well for the city to limit the use of the streets to the heavy stone work in the first storey and that after that they should be required to build a scaffold.

Mayor May said that it had been referred to the streets and parks committee. He said the streets should not be blocked at any time.

Alderman May said to the motion instructions from the council to have the streets kept clear.

Ald. Lidia said the matter might just as well be settled at once by the council.

Alderman Pelanay asked if the building inspector had given permission to use the streets, and being answered in the affirmative stated that while he was against the use of the streets by contractors the council should look into the matter and find out if they would not be responsible.

Alderman Calhoun asked the building inspector, who was present, what had been done. Mr. Wilson said that he had followed the usual custom, granted the use of 20 feet, requiring a four-foot sidewalk around it. This was, in effect, the spirit of a compromise made by the council with the builders a year ago.

To close the matter Alderman Manson moved that the matter be referred to the streets and parks committee with instructions to amend the by-law as to protect the public. Alderman Calhoun seconded.

Mayor May said he had all sympathy with the business men, but at the same time recognized the inconvenience to contractors, as buildings such as the Imperial Bank could not practically be built without free access from the front. He thought the committee could find effective means of handling the case.

The motion was put and carried. In connection with the question of the electric light rates, Ald. Calhoun, in fulfillment of his promise of last meeting, called Engineer McNaughton before the council to give his opinion of the possibility of making a rate of 9 to 11 cents pay expenses in operating the plant.

Mr. McNaughton said that Alderman Calhoun, in informal conversation, had evidently misunderstood him. The secretary-treasurer was the only party who was in a position to judge what would be a safe minimum as he was the only person having full knowledge of the expense of operating the plant. Once the secretary had set that minimum, then he was in a position to state what the maximum rate should be, knowing the difference in the cost of producing and handling for small consumers and large. He figured that the difference between the smallest and the largest consumer was 38 per cent. If the minimum was 8 cents per kilowatt hour the proper maximum was 11.08 to the smallest consumer.

Commissioner Kinnaird said that they figured out what would have been the revenue on last year's business on the 9 to 12 rate and found that in that case the city would have made \$147 only. He thought this was a small enough margin.

Ald. Calhoun said that the city practically had a surplus of \$10,000 earned this year. With this behind them the city could pay a loss if any occurred. He moved that the rate be 8 to 11 cents. The motion got no second.

The amended report of the commissioners, placing the highest rate of 11 cents and 9 cents per kilowatt hour was adopted. Ald. May, who seconded the motion, stating that he thought the city should be on the safe side.

The power phase of the question was then taken up. Ald. Picard said that they of the committee had suggested that Mr. Keady, Mr. McNaughton and Mr. Kinnaird, and that they had found that they would have to get a larger load of steady users in order to make the plant pay. Therefore they had recommended a discount of 20 per cent to the largest constant users.

Mr. McNaughton said in illustration of this that a customer having a 10 horse power motor intermittently was not as good a customer as a man using a much smaller motor constantly. He thought that the city should hold out every inducement to power users to put in electric motors for generating power. The place where the plant would pay on a power basis was the company. A long way off. At the present rate it might be two or three years away. He thought that the city should make a special effort to bring in new users of power who were installing plants and in the position of choosing between electricity and steam.

Ald. Lidia moved that the report of the commissioners be adopted. Thereupon the highest power rate at 10 cents per kilowatt hour and the low rate at 4 cents per kilowatt hour, with a 20 per cent discount to the largest constant users who take power constantly for six hours a day.

This closed the business of the council as the time limit was already passed. Another meeting was set for Thursday night, the real estate auction taking up the city hall on Friday night.

This closed the business of the council as the time limit was already passed. Another meeting was set for Thursday night, the real estate auction taking up the city hall on Friday night.

Mr. McNaughton said in illustration of this that a customer having a 10 horse power motor intermittently was not as good a customer as a man using a much smaller motor constantly. He thought that the city should hold out every inducement to power users to put in electric motors for generating power. The place where the plant would pay on a power basis was the company. A long way off. At the present rate it might be two or three years away. He thought that the city should make a special effort to bring in new users of power who were installing plants and in the position of choosing between electricity and steam.

Ald. Lidia moved that the report of the commissioners be adopted. Thereupon the highest power rate at 10 cents per kilowatt hour and the low rate at 4 cents per kilowatt hour, with a 20 per cent discount to the largest constant users who take power constantly for six hours a day.

**LOCAL.**

In order to reach the News or Editorial  
 rooms of the Bulletin, ring up Phone  
 No. 450

—The Royal Templars of Temperance  
 meet in Sanderson's Hall the second and  
 fourth Thursdays in the month. Elec-  
 tion of officers Thursday, the 28th.

—William Mitchell died on June 27,  
 aged 52 years. The funeral will be  
 held at 3 p.m. Thursday evening, 28th.  
 Deceased has been a resident of Edmon-  
 ton since 1889.

—The executive meeting of the Lib-  
 eral association which was to be held  
 tonight at 8.30 in the Young Liberal  
 Club rooms has been postponed until  
 Saturday night at 9 o'clock.

—C. M. Tait, photographer, secured  
 some good views of the review of the  
 C.M.R. yesterday, also of the recep-  
 tion given by Mrs. (Major) Jamieson,  
 of Strathcona, with Lord Aylmer as  
 centre of the group.

—The Ladies Aid of the Baptist  
 church intend holding a lawn social at  
 the home of Mrs. Young, Clark street,  
 north of the C. N. R. depot, on Fri-  
 day evening, June 29th. Ice cream  
 and other refreshments will be served.

—P. A. Belanger, supervisor of sur-  
 veys has instructed Auctioneer  
 Wright to sell by auction at the Rich-  
 elieu stable Saturday afternoon at 2.30  
 a large government surveying out-  
 fit comprising horses, carts, saddles,  
 blankets, covers, etc.

—Mr. L. E. A. Choquette, of Mont-  
 real, special sales agent for the Gut-  
 ta Percha & Rubber Co., of Toronto,  
 was a visitor at the Bulletin office to-  
 day. He expressed much surprise at the  
 size and capacity of the Bulletin plant.  
 Altogether he has a very high opinion  
 of our city and believes in its future.

—Lord Aylmer left yesterday eve-  
 ning by the C.N.R. for the east. He  
 expressed high appreciation of Edmon-  
 ton and was so pleased with the work  
 of instruction and excellent behavior  
 of the men of the C.M.R. that he hon-  
 ored them by taking the head of the  
 parade through the city.

—At the regular meeting of Friend-  
 ship Lodge, I.O.O.F., last evening four  
 candidates were received into full mem-  
 bership. District Deputy Grand Mas-  
 ter Sherar, of the Fort, who is in at-  
 tendance at the camp of the C.M.R.,  
 was present and intimated that he  
 would install the officers of Edmon-  
 ton Lodge at its stated meeting two  
 weeks hence. J. I. Mills was elected  
 by acclamation as Noble Grand of the  
 Lodge for the ensuing year. It is ex-  
 pected that the Grand Lodge of Al-  
 bert will meet in Edmonton in Aug-  
 ust, and the local brethren will spare  
 no effort to make the first gathering  
 of the provincial body since its orga-  
 nization a memorable event.

**PUPILS' RECITAL**

A recital was given in Alberta Col-  
 lege last night by the pupils in attend-  
 ance there. The program is given here:  
 Piano Duet, "Gavotte," Engelman;  
 Misses Plaughjick and Blayney.  
 Piano, "Sonatina," Op. 20, No. 1, Dus-  
 sek; Miss Edna Markis.  
 Reading, "Ride of Jennie McNeal";  
 Miss Carruthers.  
 Piano, "J'y Pense," Meyer-Helmund;  
 Miss Lillian Watts.  
 Vocal, "The Children's Home," Cow-  
 an; Miss Hammond.  
 Reading, "Spartacus to the Gladi-  
 ators," Kellog; Mr. Oscar Hsu.  
 Piano duet, "The Graces," Paul  
 Wachs; Misses Plaughjick and Blay-  
 ney.  
 Piano, "La Fontaine," Bohm; Miss  
 Molly Wright.  
 Reading (a) "Seeing things at night,"  
 Eugene Field; (b) "Sunday's Lonesome,"  
 Eugene Field; Miss Mae Dozo.  
 Piano, "Idilio," Lack-Miss Grant.  
 Vocal, "Irish Folk Song," Foote; Miss  
 Potter.  
 Piano, "2nd Valse," Durand; Miss  
 Alice Crafts.  
 Reading, "Too late for the train,"  
 Miss Cairns.  
 Piano, "Mazurka in Ebb," Leschetzky;  
 Miss Knapp.  
 God Save the King.

The closing recital will be given in  
 Macdougall's church on Thursday eve-  
 ning, June 28. When the scholarships  
 will be announced for both piano and  
 vocal. Examinations held on Thursday  
 afternoon.  
 The donors of the scholarship in the  
 piano department are Messrs. P. E.  
 Butchart, and H. R. Smith; in the vo-  
 cal Messrs. A. A. Nicholls and P. E.  
 Butchart. The prizes are restricted to  
 pupils duly registered in the College  
 and having taken at least two quar-  
 ters in music.  
 Piano.—1. To the student preparing  
 for primary examination one schol-  
 arship of sixteen dollars. 2. To the stu-  
 dent preparing for the intermediate  
 examination, one scholarship of \$16. 3.  
 To the student preparing for senior  
 examination one scholarship of twenty-  
 dollars.  
 Similar scholarships are awarded in  
 the various departments of the Col-  
 lege now aggregating \$300.  
 P. Butchart.

**Edmontonian Under Arrest**

The Calgary Herald says: G. F. San-  
 derman, formerly of the Medicine Hat  
 staff of the Union Bank, was arrested  
 at Rosehill, on Friday by Sgt. Pen-  
 nyquick, R.N.W.M.P., and was taken to  
 Medicine Hat this morning by Consta-  
 ble Oliver.  
 Sanderson was formerly accountant  
 at Medicine Hat, and was transferred  
 to Edmonton in December last, but  
 stayed only a short time, leaving the  
 bank's service in January. Since then  
 he has been residing at Rosehill,  
 where he has been purchasing grain  
 for the Brackman-Kay Milling Com-  
 pany.  
 His arrest is said to be in connection  
 with the affairs of Crompton, the Me-  
 dicine Hat bank clerk, who has been

missing since last week, and whose  
 accounts are said to show a large de-  
 ficit.

Sanderson has the reputation of a  
 quiet, well-conducted young man, and  
 his arrest has caused no little surprise.

**SOCIAL & PERSONAL**

Captain and Mrs. Saunders have issued  
 invitations to an "At Home" at the  
 C.M.R. camp Thursday evening.

J. G. Moquin, operator at Sorel, Que.,  
 is visiting Mr. and Mrs. Leveille,  
 of this city.

Mr. John Somerville, sr., returned to-  
 day from Banff much improved in  
 health.

The Misses York, daughters of Arch.  
 York, have returned from an exten-  
 ded visit to Vancouver and Victoria.  
 Mr. S. A. Blumberger, B.A., M.D., Sup-  
 erintendent of the hospital at Vegre-  
 ville, is in town to-day.

Mr. W. W. Gould, of the Department  
 of Education, is enjoying a visit  
 with his little boy Douglas and his  
 brother, P. L. Gould, from Camp-  
 bellford, Ont.

Lord Aylmer, with his staff and offi-  
 cers of the C.M.R., were entertained  
 yesterday at luncheon by the City  
 of Edmonton.

Among the many pleasant social af-  
 fairs of the week three very enjoy-  
 able dinners claimed a prominent  
 place in the earlier part, at one of  
 which Hon. Senator and Mrs. Roy,  
 who are in a furnished house on  
 Wilbrod street during their tempo-  
 rary sojourn in Ottawa, entertained  
 in honor of Premier and Mrs. Ruth-  
 erford, of Edmonton, and Mr. and  
 Mrs. Sydney Woods, also from Ed-  
 monton, the other guests including  
 Hon. Senator and Mrs. Lebridge,  
 Dr. McIntyre of Strathcona, and Hon.  
 Senator Talbot, of Lacombe. — Tor-  
 onto Saturday Night.

## NEW SCHOOLS

One of the best and most popular moves yet made by the Alberta government has been the establishment of the Galatian schools in the district north of the C. N. R. The settlers are very readily recognizing the value of these schools and are rendering ready assistance to their successful work. The Galatian boys and girls are said, by their teachers, to be exceptionally bright and quick to learn and are making progress with a diligence that may easily distance some of our English speaking children.

English is the language of Canada, it is the language in which all our business is done and every boy and girl in this province should be given a fair chance to acquire a sufficient knowledge of it to at least be fitted for commercial life. The government of the province has undertaken that this shall be done and no little credit is due the minister of education, Hon. A. C. Rutherford, for the progressive and aggressive measures he has taken for the establishment of public schools in every part of Alberta.

For some time a band of Indians known as the Sotos have been clearing up the big game in certain sections of the West regardless of the season they shoot in. A band of these Indians headed by Chief Ochase, went up through Andrew, a short time ago, to hunt in the Long Lake country. Corporal Watt, of the R.N.W.M.P., who is stationed at Andrew, dressed in civilian clothes and followed. He came upon the Indians about fifty-eight miles northwest of Andrew, and, after securing conclusive evidence that they had killed a moose, brought the party back to his headquarters.

Chief Ochase was brought before Robert Minnie, J.P., and fined \$30 and costs, in all \$33.50, for infraction of the game laws.

The chief was a fine specimen of the native American and has evidently learned the white man's game of putting his property in his wife's name, as he claimed his horses were owned by his wife. These Indians have refused to take treaty and roam about. This band had excellent wagons and horses, having a loose band of cayuses worth probably \$600. The chief enquired as to who made the law, and on being told it was the govern-

ment, he remarked that too many men were making laws and that only one man should make them.

Mr. Frank Walker, M.P.P. for Victoria District, is setting a good example to the members for rural constituencies by holding public meetings through his district to discuss the legislation of the recent session and ascertain the requirements of the different localities.

On Friday evening of last week Mr. Walker held a meeting at the new town of Lamont. Quite a fair gathering assembled in the school house, the ladies also gracing the meeting with their presence. Dr. Archer occupied the chair, filling the position in a most competent manner. The meeting was addressed by F. A. Walker, M.P.P., and Duncan Marshall. The work of the recent session of the legislature and some features of the Laurier administration were the chief topics of discussion. At the close of the meeting a Liberal association for the new town of Lamont was organized and the following officers were elected:—

Hon. president, F. A. Walker, M.P.P.; president, Dr. Archer, Lamont; 1st vice-president, E. A. Holmes, Star; 2nd vice-president, Theo. Nemirsky, Wostok; 3rd vice-president, John Kosiur, Sparrow; executive committee, Samuel Anderson, Crickford; Ira Wright, Lamont; Robt. Swan, Lamont.

On Saturday evening the school house at Whitford was crowded and a splendid meeting was the result. Messrs. Walker and Marshall spoke and at the close of the meeting an informal discussion was taken up with the result that Mr. Walker is much better informed as to the necessities of that part of his electoral district.

The member for Victoria is a worker and no distance is too great for him to travel in looking after his constituents. This is the kind of representation in the legislature that counts for something and it is no wonder that Frank's popularity is steadily growing. He is a genial, thorough-going young fellow who recognizes his duties to his constituents and is performing them so thoroughly and satisfactorily that it will be no surprise if his next election is even more unanimous than the last one.

## Mundare Progressive

Mundare, the new town on the C. N. R., between Battleford and Edmonton, is progressing and growing. The streets are being graded and will be finished this week.

The Government road grading is going out about eight miles, upon which work is progressing.

The new flour mill of G. A. Werner will be open for business on July 15th.

The addition to the store of J. F. McCallum is to be used as a temporary restaurant until the completion of the new hotel.

The Manchester House  
(ESTABLISHED 1886)

## DRESSY FOOTWEAR FOR EXHIBITION WEEK

For exhibition week you will certainly need a new pair of real nice shoes, and we are ready at any time to show you our assortment. We carry a good big range of summer foot wear and can promise you that the prices will be right and that you will find everything as advertised.

## J. K. Cornwall Returns From Visiting Europe

Has Had Enough of Continental Life  
for a While He Says, and Will  
Take a Rest in the Elongated  
Forests

Mr. J. K. Cornwall, formerly of the firm of Bredin & Cornwall, fur traders, which firm dissolved partnership some time ago, returned to the city this week from a pleasure trip to England and the continent. Jim has been absent for four months, and had a good time, but is glad to get back to Alberta. He visited France, Germany, Holland, Switzerland, Belgium and England. Times are good in the old land, Jim says. Canada is creating a wide-spread interest in all the countries he visited, and steamships on all lines are crowded with immigrants of all classes found for our fair Dominion. The immigration officials are doing excellent work in advertising Canada, and it is no trouble to interest capitalists in good, legitimate investments over here. Monied men on the continent are much interested in Canada. They have a better idea now of what the word Canada means than they have ever had. In spite of the troubles and complications in Russia, Mr. Cornwall says, the fur markets in Europe are very firm and prices good. The troubles have in no way affected the market. Mr. Cornwall says he has seen enough of continental life for a while, and is going back amongst the tall timber to take a rest. Albert is good enough for him, he remarks.

## Muck Rake Unnecessary in Winnipeg Packing Plants

The Ironsiders and the Gallagher-Hotman Place Stand Inspection by  
Provincial Board of Health

Winnipeg, June 26.—The abattoirs operated in Winnipeg by the Western Packing Co., Gordon, Ironsiders & Fraser, and the Gallagher, Holman & Fraser Companies were inspected yesterday by Dr. Simpson, Dr. Gordon Bell and E. M. Wood, from the Provincial Board of Health, and Dr. Douglas, city medical health superintendent. "We found the premises in each case in a creditable condition," said Dr. Simpson, who was at the head of the party.

**TOM ROOKS NEW MAN**  
A whale with the wallop is Will;  
He surely is stuck on the stick.  
At lining a lob  
He is on to his job  
(Right here you can lay it on thick.)  
He can bingle and bungle a bit,  
He'll score while you're throwing a fit;  
He has brains in his skull;  
When the bases are full  
He is Johnny come home with a hit.  
His natural bent is the hunt  
He is there with the sacrifice stunt.  
When a run's to be had  
And the chances look bad  
Just whittle, he'll come to the front.  
In the field? Well, just show him the place!  
At any position—can Ace!  
All spots look alike  
To this frolicsome tyke—  
That's as plain as the nose on your face.  
In the outer works? Pahaw! Simply great!  
At fielding you can't find his mate.  
Let 'em come hard or soft,  
He can spear 'em aloft,  
And deliver the goods at the plate.  
Then again he's no mutt with the mitt!  
At stabbing the wild ones he's IT  
He's no slob on the slab,  
You can send for a cab  
When he deals you the genuine apit.  
First base? His elongated bait!  
At second he's surely a saint;  
At third he's a bird,  
And at shortstop! My word!  
He can give Tinker something to boot.  
He'll give your right shoulder a wrench  
If you try his insouthern to quench  
You are up in the air  
With his rip-snorting bear,  
But — he plays all his games on the bench.

**GAMBLERS IN TORONTO.**  
Toronto, June 24.—Twenty-one men, nine alleged to be keepers and twelve frequenters to common betting houses, appeared in the police court to-day as a result of a wholesale raid by the police last night. For their release \$7500 was furnished as bail in the sum of \$500 for sleepers and \$750 for frequenters in each case.

## General Elections Probable For Manitoba Legislature

Organizer Hastings Quits His Job  
and Takes the Warpath—Colin  
Campbell Will Walk the Plank

Winnipeg, Man., June 17.—Everything indicates that Premier Roblin will shortly appeal to the country, retiring from office before the term of the present legislature expires. W. H. Hastings, who successfully organized the Conservative party in 1896 when they were returned to power after sitting in the opposition benches for seventeen years, has resigned his position in the office of the attorney general and is quietly arranging the coming campaign. It is understood that Mr. Roblin will dispense with the services of Hon. Colin H. Campbell, the attorney general, it being admitted by both parties that he has not filled the office with success. Another rumor, emanating from a source which has always proved reliable, is to the effect that the government will guarantee the bonds of an American company now being formed for the purpose of building a line due north from this city to Hudson's Bay, this being the main plank of the Conservative party in the coming campaign.

## Manufacturers' Association Arrange Itinerary

Will Visit Edmonton on September  
28th and 29th, Staying 5 Hours  
in the City

The general itinerary of the Canadian Manufacturers' Association members' tour has been arranged. The excursion will leave Montreal and Toronto in special Canadian Pacific railway sleeping cars on Friday, Sept. 14, arriving in Winnipeg over the C. P. R. on Sunday, the 16th.

On the three following days the convention of the association will be held, and on Thursday the excursion will proceed over the C. P. R. to Regina, Moose Jaw and Calgary. The trip will take in the C. N. R. as well as C. P. R. lines. The party will arrive in Montreal and Toronto on Oct. 4. The whole trip, including the convention, will take 21 days from Montreal or Toronto.

The itinerary is as follows:—  
Leave Toronto 9.30 p.m. Sept. 14.  
Leave Montreal 9.40 p.m. Sept. 14.  
Arrive Winnipeg 8.40 p.m. Sept. 16.  
Convention—Sept. 17, 18, 19.  
Leave Winnipeg 1.00 a.m. Sept. 20.  
Arrive Regina 1.00 p.m. Sept. 20.  
Leave Regina 4.00 p.m. Sept. 20.  
Arrive Moose Jaw 5.15 p.m. Sept. 20.

## Rec Deer Local News In Condensed Form

Northern Bank Opens—Site Purchased for Opera House—C. P. R. Improving Yards

Red Deer, Alta., June 25.—The Northern bank opens here July 3rd in the premises now occupied by McMillan, the jeweller. A. Scott, formerly of the Bank of Commerce here, will manage. This is Red Deer's fourth chartered bank.

Red Deer will have another drug store in the near future. The premises will be in the Alford block.

R. Jarvis is building a couple of stores on his property near Lacle's boot and shoe store.

Land has been purchased for a new opera house just opposite the steam laundry.

The Red Deer river is rising rapidly.

The C. P. R. has put in another spur at the water tank.

The Great West Lumber Company have the contract for the grading to be done in town by the C. P. R.

## C. P. R. LETS CONTRACTS.

Lethbridge, June 25.—The contract for the new C. P. R. roundhouse has been let to Mr. McDiarmid, who built the C. P. R. roundhouse at Calgary. A Calgary man secured the contract for the freight shed. Engineers are now engaged surveying the sites and building will be commenced very soon. It is understood the roundhouse will be erected between the present depot and the A. R. and I. roundhouse. The freight sheds will be built across Round street. The structure will stand about 10 feet from the street line of Baroness road.

## STRIKE SETTLED AT PORT ARTHUR.

Port Arthur, June 23.—The carpenters' strike was amicably settled here today. The carpenters' union receives full recognition and gets the scale demanded, of 35 cents per hour.

### JINGLES AND JOKES BY THE PHOENEXMEN

STRICTLY GERM PROOF  
Womans' Home Companion.  
The Antiseptic Baby and the Prophylactic Pup  
Wer playing in the garden when the Bunny gambled dup;  
They looked upon the creature with a leathing undelighted—  
it wasn't disinfected and it wasn't sterilized.

They said it was a microbe and a hot-bed of disease,  
They steamed it in a vapor, of a thousand odd degrees;  
They froze it in a freezer that was cold as banished hope,  
And washed it in permanganate with carbolic soap.

In sulphuretted hydrogen they steeped its wiggy ears;  
They trimmed its frisky whiskers with a pair of hard-boiled shears,  
They donned their rubber mittens and they took it by the hand,  
And tested it a member of the Punitigated Band.

There's not a micrococcus in the garden where they play;  
They swim in pure iodiform a dozen times a day.  
And each limes his rations from a hygienic cup—  
The Bunny and the Baby and the Prophylactic Pup.

If you want to be happy and contented, don't knock.

Nervous people will find no comfort in the reflection that, whereas the ordinary liar takes a day off now and then, the crop killer sticks at it the year round.

Just now the situation in Russia appears to be that something else is pretty certain to happen any moment.

Mary had a little lamb  
That gambled in the street;  
An automobile came along—  
Now Mary's lamb is meat.

An English member of parliament has been unseated for entertaining voters at a garden party. And every right thinking politician will agree that such wantonly direct methods of influencing public opinion cannot be too severely dealt with.

READY FOR ANOTHER.  
From Everybody's Magazine.

An impecunious Irishman, who was touring the country mealy by brackishman route, was one day enjoying the luxury of a ride on a farmer's wagon. As they rode on side by side, the Irishman noticed a handsome old house by the roadside that was apparently unoccupied and spoke of it to the farmer.

"That house," said the farmer, "is haunted; nobody will stay in it."  
"Sure, I don't believe in haunts," said the Irishman.

"Well, that house is yours if you will sleep in it one night. There is a standing offer to that effect."  
"The house is mine," said the Irishman. "Take me to the man that wants to give it away."

At dark the Irishman walked to the house, opened the front door with the key he had received from the owner and went upstairs, where he found a room prepared for his reception. Removing his clothes he went to bed, and, as he was tired from his day's journey, was soon fast asleep.

During the night he was awakened by shrieks, groans, the rattling of chains, and other unearthly noises. At the foot of his bed he saw a fearsome figure all in white pointing an accusing finger at him. With one frightened bound he was beside his clothes, and, gathering up a handful of bedclothes, he slipped on his feet and ran down the stairs, out the door, and down the road as fast as he could go.

Urged on by his fright he ran until weary nature refused to carry him any farther. Dropping on a log by the roadside he breathed a sigh of relief, and then gasped for breath. He heard a hollow cough near him, and his heart sank as he turned and saw the ghost sitting beside him at the other end of the log.

"That was a great run we had," said the ghost.  
"You're right," gasped Pat, "and as soon as I get my breath, we'll have another one."

### C.N.R. FIREMAN KILLED

Frank Flynn, fireman on the C.N.R. working out of Vermilion with the work train, was killed yesterday morning at 8 o'clock by falling under the wheels.

The engine was running backward, about two miles west of Vermilion, when Flynn fell out of the cab and the wheels passed over his body, killing him instantly.

Frank Flynn was well known in the city, having fired out of Edmonton at times. He was particularly well known among the railroad fraternity. Previous to going on the C.N.R. he was several years with the C.P. on the main line and Manitoba branches. He has a wife and two children in Winnipeg, where the funeral will be held. His body has been sent east on last night's C.N.R. express.

### CHRISTIE, BUCKET-SHOP KING

And now, we come to C. Christie, the man who so truly said "the bucket-shop is a thief." Christie was a formerly a legitimate broker at Kansas City, and St. Joseph, Mo., but a prediction for crooked work brought about his expulsion from regular exchanges, and he went to the "buckets" as naturally as a hog goes to the swill trough. He began bucket-shopping in the '90's, under the style "Christie Grain and Stock Company," which still is the name of his syndicate. John Hill, Jr., who so ably managed the great crusade the Chicago Board of Trade made against bucket-shops in the first years of this century, caught Christie at a telephone receiver concealed behind the blackboard in the legitimate broker's office, and connected with his own "plant" by hidden wires. This quotation thirvery was broken up and in 1900 Christie began suit against the Chicago Board of Trade to restrain it from refusing him quotations. The courts decided he was a bucket-shopper, and he lost his suit. May 8, 1905, the United States Supreme Court, in a decision already quoted, enjoined Christie and his outfit from stalling Chicago Board of Trade quotations. Christie then established the National Board of Trade of Kansas City for use as a "quotation foundry." Merrill A. Tague, in "Bucket-Shop Sharks, in Everybody's Magazine for July.

### Advance Foreshadowed In Lumber Prices

Mountain Lumbermen Claim That It Costs More Money to Get Out Logs—Freight on Green Lumber a Factor

Vancouver, June 27.—The recent rise in the price of lumber is being much discussed throughout the province and in the interior generally.

A prominent lumberman, in talking over the situation with your representative, said the advance is simply and inevitably the result of the market. Less money is being made in lumber today than in 1903 and the price of supplies are now higher and labor has also increased in price. One point that is the direct result of the development which has taken place since then is that it takes three donkey engines to do the work that was done in 1903 by six horses, the distance from which the logs have to be brought to water being so much greater now than then. At present, too, most of the millmen are shipping green logs and the freight on green lumber is nearly \$2 per thousand more than on the seasoned lumber on account of the additional weight. Even at the present prices the supply is far short of the demand. The output from the interior this year is short because of the small amount of snow which fell during the winter, preventing much logging being done. However, the summer logging in the interior is being carried on in a more extensive way than ever before but the demand is so great that another increase in price is quite likely during the next few weeks. This year there is at least twice as much building being done in the North-West as in any previous year and added to that San Francisco builders are sending representatives to the British Columbia mills to buy up all the available supply.

### EFFICIENT MUCK-RAKING

The adoption by the Senate of the Meat Inspection Bill, inscribed as a "rider" on the Agricultural Bill by Senator Beveridge, of Indiana, was another notable triumph of muck-raking. The bill simply provides, in effect, that the meat eaten by Americans shall be as carefully inspected as meat intended for export. The poisoning of our own people's must cease. Walling and gnashing of teeth are heard in Armourville. President Roosevelt got hotly and justly indignant over this tainted-packing-house business. A report of the Commissioner of Labor and of Mr. James B. Reynolds, an Assistant of the Treasury, on the infamous conditions of that business has not been printed at this writing. Whether it is or not, the packers are down on their marrow-bones. And the man who stirred up the president really caused the report to be made, really made the packers yell for mercy, really had the bill passed providing for the inspection of meat intended for interstate commerce, is a private citizen, a young man and muck-raker named Upton Sinclair, whose true and startling exposure, in this magazine, of the shameful and almost incredible state of things in "Packingtown" our readers vividly remember. "With the Precession," Everybody's Magazine for July.

MONTREAL.

## Lives and Customs of the Esquimaux

By Capt. D. M. HOWARD

In his annual report to the Dominion Government at Ottawa, Captain D. M. Howard, writing from Herschel Island at the mouth of the Mackenzie river, says:

### Esquimaux.

The Esquimaux to the east of Point Barrow and following the line of the shores of the Arctic ocean to the eastward in our territory, are, from what I have been able to learn from the whalers, distributed in three settlements. The largest at Herschel Island, eighty miles to the west of the mouth of the Mackenzie river. The next on Richardson Island, in the eastern channel of the Mackenzie river at the mouth of the Mackenzie river. From these points they wander over the country adjacent to the shores of the Arctic ocean. It is very hard to get an idea of their numbers. No one here seems to know. To make this report as clear as possible, I have divided it into different heads and report separately under each. 1. General appearance. 2. Houses used in winter and summer. 3. Clothing. 4. Food. 5. Languages. 6. Articles used by them in hunting and fishing. 7. Means of travelling summer and winter. 8. General habits and customs.

From what I can learn, the Esquimaux on this side of the Arctic ocean are a much finer race physically than those of Hudson Bay and Labrador. Mr. Pirih, the Hudson's Bay Company officer here, was stationed in Hudson's Bay a long time a number of years ago. He knows these Esquimaux, having been down to the ocean on several occasions, and tells me that the Esquimaux here are much larger and finer looking. Those I saw at Herschel Island and Arctic Red River and also here were large and powerfully built men, many being over six feet, and had the appearance of great physical strength. The same applies to the women, who were tall and well formed. They were lighter in color than the Indians here, with either black or brown eyes, straight black hair, high cheek bones with fleshy, intelligent faces, and, like the Indians, small and well formed hands and feet, and very good teeth.

I noticed some old men whose hair was quite white and whose teeth were still sound. The men in some cases had thin straggling beards, and wore the labrets or lip ornaments, in the corners of the mouth, but the custom I think is dying out, as I noticed old men, in whose lips holes had been cut for the purpose, not wearing them, and a number of young men and boys I noticed, had not their lips cut. The men's hair is cut close on the crown of the head after the fashion of a monk's tonsure. They are nice-looking when young, but the life of hardship and exposure they lead in this climate causes their faces to wrinkle up and ages them very quickly. The men I saw had no tattoo marks on their faces, but the women had three blue stripes from the mouth to the chin. I understand this is a tribal mark and varies in different localities. In some tribes the women have only one stripe and in others two, and again different designs tattooed on the faces. The women here do not wear the labret or lip ornament, but have their ears pierced and wear ear-rings of ivory-bone and beads of different shapes. Their hair is worn long and twisted up into a long knot at the top of the head.

Neither men nor women wear any covering for the head, the hood that is always attached to the fur upper garment answering for this purpose, being put up during cold or rainy weather, and in fine weather is thrown back on the neck. Of course, judging from our standards they are very dirty, and in a good many cases covered with vermin. Although I saw in two or three tents at different camps, and noticed them using them to wash their hands and faces. However they are cleaner in appearance than the Louches I saw at Macpherson, and physically far superior.

The houses used by them in winter are of two kinds, those used in permanent winter camps, and those used in their short travelling camps. In making a permanent winter home a square of about twenty-five feet is marked out, then this is dug out to a depth of between four and five feet, and at each of the corners a post of drift wood procured from the beach is driven in the ground about a foot from the wall of the square they have dug out. Other posts are now driven in the ground at intervals between the four corner posts. Logs of driftwood are now procured from the beach and piled between these posts and the sides of the wall, one on top of the other, until the wall is built up to the top of the posts. Logs are then placed across the top to form the ceiling, and against the outside and upon the roof, earth and sod is piled up until it has the appearance of a mound when seen from a short distance. A small square opening is left in the roof, in the centre and across this is stretched the transparent bladder of the seal or walrus. This serves as a window and furnishes the light for the room below, a very poor one, it must be said. A small platform runs round three sides of the room, and in the winter they trade

and it is the place where they sit during the day and sleep at night. These platforms are covered with deerskin robes. A small doorway in made in the fourth side of the square leading to a smaller room built in the same manner as the larger one already described. At the far end of this room is a small shaft of varying depth leading to the outside. This is the entrance to the house and is kept closed in stormy weather to prevent snow from drifting in, being covered either with boards or skins. These houses are very warm, but of course are very dark and badly ventilated, and must be unhealthy. When the warm weather comes these houses become so damp that they are no longer habitable, and the Esquimaux are compelled to move out to summer quarters. I noticed a number of houses of this description at Herschel Island. In one case the sides of the house had been made from barrel staves.

The snow house is one built for shelter every night when travelling during the winter. The hard packed snow is cut in square and built up in the form of a dome, the circle narrowing the higher the walls get. A shaft is built as an entrance to this house through which they crawl to the snow house proper. These houses can only be built during very cold weather, when the snow is hard. They are very warm and some of the Esquimaux live in them all winter.

In summer they live in the ordinary canvas tent, procured, I presume, from the whalers and others, in tents of skin thrown over a frame of wood, and kept down by stones from the beach, being piled about the bottom.

A suit of deerskin, consisting of two garments, the upper and the lower, covers their clothing. These suits are generally made of deerskin, but are also made of other skins. The upper garment is made on the same pattern as the Yukon parka, all on one piece, and is pulled on over the head. When it reaches nearly to the knees. It is provided with a hood of the same fur. This hood is generally lined with fur and the sides trimmed with wolf or some other long-haired fur, this helps to cover the face when the hood is up, and in travelling this long hair is constantly blowing across the face and prevents it from freezing. The lower garment or trousers, is also made of fur fastened around the ankle, and tied round the waist with a draw string in a loop of skin sewn around the border. The winter boots are made of seal or deer skin tanned with the hair in, and soles of walrus skin. The feet are made very large to allow of stockings, or duffie being worn with them. The fur is inside next the skin. They are very warm. The summer boot is made of skin tanned with the hair off, with walrus skin soles. These boots are kept greased with seal oil, rendering them waterproof. These boots reach just to below the knees, and are fastened about the ankle with throng like a moccasin and are tied about the top with a draw string. In winter two pairs of fur are worn, one with the fur inside next to the body and the upper suit with the hair outside exposed to the air. In summer only one is worn, and I noticed a number of men at Herschel Island and on the river wearing upper and lower garments of tallow and deerskin, procured no doubt from the whalers. The women also in a number of cases were wearing dresses of calico nearly to the ankles over their skin clothing.

The dress of the men and women is the same with the exception of the cut of the woman's upper garment, which is made much fuller at the back to allow a child to be carried under it. The child has its arms about the mother's neck, and is held in place by a long strap passed round the thighs and across the mother's breast. I saw women carrying their children in this fashion under the calico upper garment, at the island this summer.

The woman's upper garment is also cut longer in front and behind, and is not square all round, but is cut up the sides nearly to the waist, leaving a long flap hanging in front and behind. They also make waterproof garments of the same pattern from the intestines of the seal. The intestines are dried and then cut open and the long ribbon-like strips sewn together. These are perfectly water-proof and are worn over their ordinary clothing. Some of these garments are pretty ornamented, but are in the most cases perfectly plain.

The food of the Esquimaux about Herschel Island consists for the greater part of fish, of which they take a great number. I watched them at one of their favorite fishing grounds, in a large bay near Cape Point, in the Arctic ocean, about twenty miles from Herschel Island, and saw for the greater part of the day they were always full. These with seal, walrus, whale and wild fowl form their principal food. Those at the island also get a number of caribou and mountain sheep in the mountains near the coast. I am told that they bring in quite a supply of moose in the winter which they trade

to the whalers or missionary. The missionary, Dr. Whitaker, had quite a large quantity of frozen deer meat hanging in his ice-box when I was at the island, that he had brought from the Esquimaux.

The implements used in hunting and fishing are: Bows and arrows, spears, nets, traps, and rifles of modern pattern. Their bows and arrows are made of ordinary wood, with the heads of the arrows made of bone or flint, and I have seen some made out of copper. The shafts of the spear used in seal hunting are made of wood and are light, and about four feet long, tipped in most cases with bone or ivory. In hunting seal they have these spears in front of them on the kiak or light skin boat, held in place by being passed under a band of walrus attached to the kiak in front of them. On alighting the seal they lasso the spear from this band and place it close to them across the kiak and paddle up as carefully and noiselessly as possible, and when close enough throw the spear or stab it. In order not to lose the spear Lives and customs of Esquimaux take 2 or seal they have a long line attached to the end of the spear shaft and at the end of the line a large blown up bladder. Some of the spears have a detachable point that detaches itself from the shaft as soon as the seal is struck. As this point is attached to the line attached to the shaft the shaft keeps the line floating in the same way as the bladder and also enables them to locate the seal. They go out close to the ice pack and paddle along in the kiak watching for seals for hours at a time.

A number of them have breech-loading guns and rifles, procured I expect from the whalers, and I have seen them using their rifles to shoot seals, but they prefer the spear for this as unless they shoot the seal in the head it sinks and they lose it. I saw one shot in this way in the trip down to Herschel Island the man hit it in the back and it sank at once and never came up, though he waited a long time. We found a seal shot in the back, dead on the beach, where it had drifted ashore at the same place as the man shot the one on the way down and this must have been his seal.

Those hunting caribou and mountain sheep on the mainland use the rifle, and at the present time the use of the bow and arrow is confined mostly to the small boys. I have a number of specimens of their arrows with heads made of flint, bone and copper, but their spears they do not like to part with, and so far I have been unable to procure any.

Their hooks used in fishing are made from ordinary wire nails (small size) filed to a sharp point and bent in the shape of an ordinary fish hook. They carve a fish out of bone or ivory and insert the nail in the head, another hole being drilled through the tail to which they attach the line. They look very much like the metal fish used for trolling in Eastern Canada. I have secured a number of specimens of them. I have one in which the fish has been filed out of brass and being an ordinary tack has been filed with a nail and inserted in the head in place of a nail and a piece of bright red flannel attached to it. The lines and nets that I saw used were of the ordinary kind procured from the whalers. Their old native traps have also been nearly every case given place to ordinary steel traps supplied by the whalers.

I have not been in the country long enough to make a satisfactory report of their language.

In summer two different boats are used, the light hunting boat or kiak, and the larger travelling boat called umiak. The kiak is a light skin boat of about fifteen feet in length and from two feet three inches to two feet six inches wide. The frame is made of running lengthwise and brought together at bow and stern where they are firmly lashed by raw hide cords. The upper rail is a little heavier and is also of wood, into which the upper ends of the ribs are inserted and tightly lashed with rawhide cords. In the middle is a circular opening large enough to permit a man to sit or kneel in it, surrounded by a wooden hoop that is fastened by two pieces extending from the bow to the stern, these pieces resting on and being held up by the cross pieces supporting the deck. Over this frame a skin covering made of seal skin tanned with the hair off and sewn together with the half oil is stretched and lashed in its place and allowed to dry. When it dries it contracts and becomes as tight as the parchment of a drum. Two stout rawhide cords about three feet apart cross the deck from side to side in front and two in a similar manner behind. These cords are used to hold the paddles or pears when not in use. These boats are cranky and require an expert to handle them. A novice is almost sure to turn over the first time he gets into one. They look something like a decked in Rob Roy canoe but are much longer and narrower and more closely resemble the model of a racing shell.

The Esquimaux are very clever at making models of these boats and I have seen many of these boats made for me at the island, complete in every detail, even to the spears and paddles. The umiak is a much larger boat and is the one used to transport their families and all their household possessions when changing from one

camp to another. Those I saw at Herschel Island were about thirty feet in length with a beam of six feet. They are open boats, not covered over like the kiak, but are made in the same manner. The frame is made of pieces of drift wood nicely shaped and fastened together with rawhide cords. The frame is much heavier than that of the kiak and the skin covering is made of thicker skin, generally walrus or heavy seal skin, tanned with the hair off. When the frame is ready the skin is drawn over it tightly and lashed in position and allowed to dry. When dry it contracts and becomes very tight. The skins of both these boats require to be oiled with seal oil every four or five days to keep them from rotting and to render them watertight. These boats are propelled with paddles or canvas sails. They will carry five or six passengers and about twenty-five hundred pounds of freight.

In winter the travelling is done with dogs and sleds. The sleds are of two sizes, a large one about nine feet long and of heavy frame made from drift wood, after the fashion of the sled used in the Yukon. They do not use the flat toboggan of the Mackenzie river. These sleds have usually from seven to nine dogs on them and a load is considered about three or four hundred pounds. They have also a much lighter sled more like the Yukon in size but smaller and lighter. These are used in short hunting and fishing trips and are very often drawn by the hunters themselves. The runners of these sleds are generally shod with whale bone. The snow sled used is similar in shape and size to that used in the Mackenzie river, long and narrow and turned up in front.

I observed at Macpherson and Herschel Island one of the few customs I noticed on meeting the Esquimaux was that of wearing labrets. Those I noticed the men wearing were in all cases made of either ivory bone or glass, about half an inch or more in diameter, worn at both corners of the mouth. I noticed old men in two cases wearing one very large one instead of two, made of ivory. They must have been quite an inch and a half in diameter and had a head made of blue glass in the centre. These labrets are made in a hat shape. The rim is inside and next to the teeth and holding the labret in its place. The cutting of the lip must be a painful operation, as the opening is quite large. During youth a slit is cut in each corner of the mouth and an ivory or bone plug is inserted until the wound is healed. The hole is stretched from time to time until the opening is about half an inch long; into this opening the labret is inserted. I noticed no case of a woman wearing a labret, but was told that below Behring straits they do, and I suppose the custom varies in different localities, as I noticed no men with tattoo marks, but was told that the women I saw had tattoo marks on the chin in the centre extending from the lip to the base of the jaw and wore ear rings of ivory or bone or beads. I was also struck with the custom of the men cutting the hair on the crown of the head close in the shape of a monk's tonsure. This custom appears to be general, as all I saw, both men and boys, had their hair cut in this fashion. They seemed to have few household goods in their dwellings, some dishes made of wood or stone, and open alone lamps used for burning seal oil. These lamps serve the purpose of both lamp and stove. They also have a few iron and copper kettles procured from whalers, and in some cases washing basins.

These, with the skin bags used to hold the seal oil, complete the usual number of their household articles. Like the Indians they are inordinately fond of liquor and tobacco. The pipes used by the men have a long, slightly curved wooden stem made in two pieces, an upper and lower, banded together with seal skin cord. The bowl is made of metal with a large rim. The opening in the bowl is small and holds only enough for a few whiffs. The men in some cases were smoking the ordinary wooden pipe procured from the whalers. The more nicotine in the pipe the more it is, the more they use. The pipe of the women is very small and closely resembles the pipe I saw my Japanese servant smoking in the mess kitchen at Dawson. I have a good specimen of the men's pipe, but was unable to procure one of the women's. Their tobacco pouches were made of the ordinary seal skin, fastened with a draw string.

I find they also use the sweat bath in the same way as the Indians. A small pit is dug in the centre of the room and a fire of drift wood built in it. When the smoke had cleared away and the wood was reduced to a bed of coals, a cover is put on the smoke hole and the heat retained in the room and men sit about naked until they are in a profuse perspiration. They then go out and roll in the snow to cool themselves. Several years ago a large band living at Richards' Island, at the mouth of the Mackenzie river, were attacked by measles and resorted to the sweat bath for a cure with disastrous results, more than half of them dying.

They do not seem to have any special ceremony connected with marriage, the man simply taking a wife and living with her so long as both are satisfied. In case of disagreement either one leaves the other and takes up with some one else. There were cases at the island where men had two wives, and in one case a woman had two husbands, reversing the Mormon custom.

## BUILDING UP THE WEST

Thousands of Miles of New Railway Under Construction

A Winnipeg correspondent of the Toronto Globe contributes a very interesting account of the immense railroad development now in progress in the provinces of Manitoba, Saskatchewan and Alberta. The building up of the prairie provinces is of vast importance to British Columbia and rapid as has been the growth of recent years it would appear that the coming years are to see even greater expansion.

Transportation and electric power are the all-engrossing problems of the moment in Winnipeg. Both are intimately concerned with the future of the city, and the first, at least, is an integral part of the development of the whole west. The east, too, is vitally interested in both problems. The better the transportation facilities the better the chance of our eastern manufacturer to serve the western buyer. On the other hand, the power problem has in it the elements of danger for the eastern manufacturer. Winnipeg seeks to become a manufacturing city. The agitation over the white coal of Niagara has set the western mind thinking, and Winnipeggers want to harness the water powers of the lakes and rivers of the region about them and to manufacture for the vast population of the plains beyond. Allowing the feasibility of the proposition, the danger to the east is still happily somewhat remote, for it will tax all the manufacturers of the country for years to come to keep pace with the ever-increasing demand of the people of the prairie.

Taking the transportation problem first, let us look for a moment at the railway propositions that are now before the public so far as they affect the region between Winnipeg and the mountains. But a year or two ago, it seems, the Canadian Pacific was absolutely alone here, save for an occasional challenge from the lines over the border. Now the Canadian Northern, with its connections, has almost duplicated the former transportation facilities and is still building in every direction; the Grand Trunk Pacific promises immediately a third trans-prairie railway, with branches in every direction as quickly as they can be built, and, finally, Mr. Hill springs in with his sensational announcement of a fourth railway that shall traverse this wonderful western belt of Canada, and that shall also be constructed immediately. This announcement of the new Hill road has been received generally with extreme satisfaction, tempered with a feeling of regret that the new line may seek its affiliations over the border by an American port. But even this prospect or possibility does not seriously lessen the general welcome extended to Mr. Hill. Finally, it need hardly be added that the C. P. R. as befits the pioneer railway, is continuing to throw out branches, great and small, and to serve the population within its reach.

The summer programme of the different railways represents several thousand miles of construction and over one hundred millions of expenditure. Probably not all of it will be accomplished, but if promises of the most solemn character are to count, there will be not less than five thousand miles of new railway completed before next winter within the region bounded, roughly, by Winnipeg, Prince Albert, Edmonton, Lethbridge and Regina. Estimating the cost of construction at the figure given for the construction of the Grand Trunk Pacific prairie section, \$20,000 per mile, and taking the minimum of \$20,000 we find the expenditure a round hundred millions.

And it must be remembered this is to be only one summer's work. There may be no further through lines after this, but the building of branch lines must proceed as rapidly as ever while the development of the country continues. The program of the moment is, of course, abnormal because of the incoming of two great new lines, but a couple of thousand miles of new railway each summer would do no more than keep pace with the new districts that are being continually opened up. If we divide by two the amount above estimated as a possible expenditure on railway construction during the present season, it still represents the huge total of fifty millions, and it is hardly possible to overestimate the effect of this great addition to the ordinary revenue of a country whose population is yet probably within the million mark, despite the rapid growth of recent years. Money circulates plentifully and easily, there is an abundance of capital for all the numerous enterprises necessitated by extraordinary

Continued on page 9.

## BUILDING UP THE WEST.

Continued from page 8.

any expansion, and the settlement of the country proceeds without the evidences of hardship and distress that were a feature of pioneering in the earlier days of the west, and equally of pioneering in Ontario. Railway construction, too, provides work everywhere here for the man with the shovel, and it is with the shovel and the pick that fortunes are founded in the west. Every man with labor to sell has his choice, therefore, between the farm and the railway.

Here, so far as I have been able to gather them, are the details of the summer and fall program of railway construction in the prairie country. In the case of the Canadian Northern I have included in the list the two newly constructed lines to Edmonton and Prince Albert. Their appearance on the scene is so recent that the reader will not perhaps otherwise realize so clearly how the plains of the west are being grid-ironed with the steel of the railway:

## NEW CANADIAN PACIFIC LINES.

1. The C. P. R. will build this summer from Shoho, the present end of its Yorkton branch, to Saskatoon, 185 miles.
2. The C. P. R. line at present ending at Strasburg will be continued to meet the Shoho-Saskatoon extension, 75 miles.
3. From Saskatoon the C. P. R. will build west to Daysland, where it meets a spur of 33 miles, running out from Wetaskiwin, about 250 miles.
4. From Tuxford, a spur 12 miles north of Moose Jaw, the C. P. R. will probably build northwest to the Elbow of the Saskatchewan, on the way to meet the new C. P. R. coming east from Lacombe and already built out to Stettler. The total length of this line will be about 270 miles, of which at least the portion to the elbow will be constructed this summer. When completed this line will be an almost direct route to Edmonton.
5. From Shoho to Prince Albert, another continuation of the Yorkton line, is a proposition of the immediate future, though it may not start this summer; about 200 miles.
6. The C. P. R. plans also a railway from Swift Current on the main line northwest to a point on the proposed Lacombe-Moose Jaw line; about 200 miles.
7. A short but important piece of C. P. R. construction will be a cut-off from the Sault line to some point on the Avoca-Regina branch, so that the 40 mile jog from Moose Jaw back to Regina may be saved for passengers going up into the Saskatoon and Prince Albert district.

## CANADIAN NORTHERN LINES

1. The Canadian Northern main line is, of course, already completed between Winnipeg and Edmonton, 327 miles, on the one hand, and between Winnipeg and Port Arthur on the other, 430 miles.
2. The C. N. R. line from Dauphin to Prince Albert, 320 miles, is already running to Melfort, 302 miles, and through trains to Prince Albert will begin June 3.
3. The rails are practically laid for a new C. N. R. line from Edmonton northwest of Morinville, about 40 miles. This is the beginning of the section that will ultimately go on to the mountains and through to the coast.
4. The C. N. R. has recently connected its line to Hartney with Verdun, on the C. P. R., giving that place and points west a double service east and south; about 40 miles.
5. Construction has already commenced on the C. N. R. line out from Swan River on its Prince Albert branch to run between the two existing C. N. R. lines, and to connect eventually with the main line at a point a few miles east of Battleford; about 375 miles.
6. The present line to Prince Albert will be continued to connect with the main line a few miles east of Battleford; about 150 miles.
7. A C. N. R. line was located last winter from Erwood, on the Prince Albert branch to Pas Mission, better known as "The Pas" or Cedar river. This will be the most northerly piece of road in Canada, and will doubtless be ultimately connected with the Hudson's Bay; distance from Erwood to Pas, about 150 miles.
8. There is a charter for a railway running from Prince Albert to Battleford and Edmonton, on the south side of the Saskatchewan, and it is surmised that the C. N. R. is at the back of the enterprise; about 375 miles.
9. The C. N. R. short line now running to Rossburn will be continued to connect with the main line at Kamasek; 100 miles.
10. A seventeen mile spur will connect the C. N. R. main line with Saskatoon, on the Prince Albert branch of the C. P. R.
11. The C. N. R. line running north from Portage la Prairie to Delta, at the foot of Lake Manitoba, will be continued up the west side of Lake Manitoba, to some extent paralleling the main line of the C. N. R. and connecting with

it at Dauphin; about 110 miles.

12. The line from Winnipeg to Oak Point, on the east side of Lake Manitoba, will be continued north, crossing the lake at the Narrows, and connecting with the main line to Dauphin; about 200 miles.

13. The C. N. R. line through western Manitoba at present comes into Winnipeg by way of Morrison on the Emerson branch. The C. N. R. has expressed its desire to build from Morris across to the Port Arthur section of the main line, provided the provincial government will build a bridge across the Red river at Morris; 100 miles.

## GRAND TRUNK PACIFIC LINES.

1. There is, of course, first the Grand Trunk Pacific main line from Winnipeg to Edmonton; the prairie section of the line; 150 miles.
2. The G. T. P. surveys are already busy locating a branch line from Saskatoon through which the main line is expected to run, to Calgary; about 100 miles.
3. Regina will be connected with the main line of the G. T. P. in the Touchwood Hills district; about 100 miles.
4. A G. T. P. branch, already planned, is from Prince Albert to Calgary, crossing the main G. T. P. line at Battleford; about 500 miles.

## THE HILL LINES.

1. It is only within the last few weeks that the railway enterprises in Canada of J. J. Hill have assumed the dimensions of a transcontinental line. Nothing is certain yet beyond Mr. Hill's declaration that he intends to build through to the coast, which is assumed to mean that he will build from Winnipeg to Lethbridge by way of Fort Walsh and the Cypress Hills and then avail himself of running privileges over the Crow's Nest division of the C. P. R. provided such concessions can be secured from the government. This will connect the new transcontinental line with Mr. Hill's Kootenay and Washington state roads. The main line from Winnipeg to Lethbridge will be about 800 miles long.
2. Of the many branches which the Hill road will throw out, there is already under construction and being pushed rapidly that from Boissevain to Brandon. The road is being constructed by the Brandon and Saskatchewan Railway company, but that is only another name for James Hill; about 100 miles.

The Portage and Midland Railway company is building from the boundary line north to Portage la Prairie through Morden. Work on this branch also is being rapidly pushed. This also is a Hill line though not constructed in his name; about 100 miles.

## A PEPPERMINT FARM.

As civilization advances and reaches the outposts, even the bogs and marshes are being utilized. There are frog farms, where the delicacies are cultivated as carefully as the product of the trout streams or the lakes which are populated by the work of the fish commission. But the swamps have other uses. It was the son of a Michigan farmer who conceived the idea of raising peppermint on a large scale; and when nineteen years old he began operations on fourteen acres of his father's land. This experiment proved so successful that he went to England and studied the industry on its native soil. On his return, he bought fourteen hundred acres of swamp land which was worthless for all ordinary farming purposes. Fourteen miles of drainage ditches were dug, the tangled wood growth cut, and the stumps grubbed out of the ground. The horses that were used in the first plowing had to be fitted with broad wooden bog shoes to prevent sinking into the spongy surface, and the soil is still loose and shaky, especially in the spring. The whole surface was planted with the fragrant mint. The distilled oil found a ready market; but there were thousands of tons of wholesome peppermint hay—the refuse of the product after the essential oil had been extracted—and the animals on the place could consume only a small portion of it. The owner therefore formed a stock company and bought seven thousand acres of wild stump land some distance north of the mint farm. This new purchase was dedicated to the use of five hundred head of blooded cattle which were brought down to the big barns in the autumn and fed upon mint hay during the winter. Ordinarily the crude mint oil is worth about two dollars a pound, and the United States furnishes the markets of the world with the larger part of it. The business is therefore profitable.

## A WASTE PRODUCT UTILIZED.

Nature sometimes takes a hand in the farming business and insists upon raising a valuable crop without assistance. An instance of this is found in the wire grass which took complete possession of the

marshes and bogs found extensively in the great glacial belt extending from the Ohio river far into the British North-West. The plant is not only almost as tough as the wire for which it is named, but as it is destitute of the chemicals which constitute a food value it has been the despair of the farmers upon whose lands it insisted upon making its home. Cutting it did no good; for it was up again before the season closed; burning it off the land in the dry season seemed to have an exhilarating effect upon the next year's growth. Its extirpation therefore was an impossibility; the only way was to abandon the land to this determined invader. At last, however, somebody conceived the idea of turning its toughness to account by making it into a coarse twine for binding grain. This experiment proved successful, and machinery was invented for the manufacture of the product. By November, 1897, the twine business was flourishing on a commercial scale in Oshkosh, Wisconsin, and enormous plants have now been erected at other points. Not only this, but the long, slim stalks without a joint or a break are now woven into matting which find a ready sale, being almost indestructible. It is also used in the manufacture of furniture which was formerly made almost entirely of willow. A large factory has been established in Brooklyn, New York, where wire grass is utilized in making tables, chairs, settees, baby carriages, screens, baskets of all kinds, and even doors, picture frames, and other novelties. Should the tough and innoxious stems which have become so valuable ever become exhausted by the continued demand, uses will be

found for the enormous peat beds which underlie the vast expanse of wire grass and reach to a depth of from one to twenty feet below the surface.

## MILLIONAIRE CHARGED WITH MURDER.

New York, June 26.—Harry Kendall Thaw, the young Pittsburg millionaire whose escapades have made his name famous around the world, was arraigned in the Jefferson market police court this morning charged with killing Stanford White, millionaire, and probably the best known architect in America. The police searched all night for Mrs. Thaw, but were unsuccessful.

## CANADIAN NORTHERN RAILWAY.

Pursuant of Section 175 of the Railway Act, 1903 notice is hereby given that a plan, profile and book of reference of proposed spur tracks of the Canadian Northern Railway for industrial purposes at Edmonton, Alberta, have been filed in the office of the Registrar of Deeds for the Northern Alberta Land Registration District, at Edmonton, Alberta.

## THE GREATEST OPPORTUNITY

\$

The investing public of Edmonton have had placed before them for a considerable time is that of purchasing a block of one of the finest west-end properties ever placed on the market at extremely reasonable prices and on very easy terms.

Frontage on Jasper Ave.

## NORTH JASPER PLACE

Frontage on Jasper Ave.

Is certainly one of the choicest suburban properties lying to the West of the City. Stands beautifully high, commanding an open view of the city and has the advantage of frontage on the recognised, business section, namely, Jasper Avenue. At no distant date this property will be in great demand as a Choice West End Residential Location and with a street car service will prove one of the greatest investments offered this season.

Get in on the Ground Floor

## STOP AND CONSIDER

Get in on the Ground Floor

North Jasper place has been very carefully subdivided by the Dominion Land Surveyors into Blocks, each containing twenty full sized lots of 150 feet x 50 feet. The streets are 66 feet wide and the lanes 16 feet. With the property sub-divided in this manner there will be no trouble in the future about allowances for streets, etc. The same cannot be said of many of the sub-divisions. Our advice is to buy a block, half block or quarter Block of this property, and buy it NOW, as there is nothing like getting in on the ground floor.

EASY TERMS

## REASONABLE PRICES

EASY TERMS

With the view to giving the small investor an equal opportunity to that generally offered to the man with greater means, we have decided to offer a limited number of quarter and half blocks at the wholesale price. This will be readily appreciated by all who have only a small amount available for investment. We have quoted the very lowest possible figures on this property and from present indications the whole sub-division will be sold within the next thirty days. Prices must be advanced next week.

## THE SPORTING WORLD

### Wetaskiwin Thrown Down

By the Tail-Enders

Strathcona Put the Bingle-Bangles all over the Infants in the South Town Last Night

Wetaskiwins licked. Wetaskiwins whooped. Wetaskiwins defeated on the field of battle, and put to rout by a modest little bunch of baseballers from Strathcona. Impossible! That Wetaskiwin, the home of western fans, should suffer defeat in such a blood-curdling manner. Ye who believe in Wetaskiwin, who have cheered and yelled for their nine, listen to the tale of defeat, sung still and low by the fans from Strathcona.

Flushed with victory and glories won on southern fields, the ambitious nine from the new-made city, came north yesterday in search of spoils, and got off at Strathcona for a game. Easy money, they thought; but they got a surprise that took the wind out of their stomachs and the stuffing out of their mitts. Yes, Strathconas didn't give a two-bit counterfeit for their chances before the game yesterday. They were awed by the shadow cast over them by Wetaskiwin elephants. But they got out their team, and dressed them up, placed them in their positions and set the machinery going, and never let up till nine chapters were concluded of a terrible tragedy. All you could see was the Wetaskiwin score, which was in the form of a blood-red figure 3, while the other score went so high it was lost to view over the tops of the tall timbers. And there was weeping and gnashing of teeth in the House of Wetaskiwin that night.

Strathcona went forward to battle with trembling knees, and Allen in the pitcher's box, with Regan to hold him. Allen never knew what was in him till last night. He is an off-flipper with the curves and speed of an Eastern leaguer. Ball on first pillow, who was represented in the columns of this journal last week as being a pitcher who could not make good, has turned out to be a first baseman who always makes good, and who comes in from the alfalfa belt to play with the Strathconas as one of their monuments of strength.

The fielding of Doc Dresser and Company was a wonder.

### PLAY BY INNINGS.

First, Wetaskiwin, Martin to bat, out on fly by Dresser. Dahl, elephantine, fanned. Pitman, first base on safe hit. Gouchee first or safe hit. Murray, hit, out on first.

Strathcona, Allen batting: First on safe hit, stole second. Wylie, first on error of Dahl, stole second. Allen came home. Ball, hit, first on error of Dahl. Wylie scored. McKerricker, caught out on fly by Dahl. Dobson, safe hit to first. Winchester first on a bunt; Ball came home. Regan, first, error of Murray. Pettit fanned. Dresser caught out by Barrett. Score 3-0.

Second, Wetaskiwin: Walcott, first, error of Wylie, stole second. Phellon to first, Walcott scored first and only. Barrett out on first, S. Murray fanned; Martin out on fly by Dobson.

Strathcona: Allen, first on error of Dahl, Wylie, out on first, sacrifice hit. Ball, safe hit to third, Allen came home. McKerricker's base on balls; stole second. Dobson, safe to first, bases full. Winchester out on first, Ball came in, Regan out on first. Score 5-1.

Third innings: Wetaskiwin, Dahl on first safe. Pitman out on foul fly by Winchester. Gouchee, out on fly by Pettit. L. Murray, safe to first. Phellon, to first, bases full. Barrett out on fly by Wylie.

Strathcona: Pettit fanned, Dresser out on first. Allen, safe to first, stole second. Wylie out on first. Score 5-1.

Fourth innings: Wetaskiwin, Barrett out on first, S. Murray out on a foul fly by Winchester, Dahl out on fly by Pettit.

Strathcona: Ball, base on balls, stole second. McKerricker, safe to first. Dobson out on fly by Walcott. Winchester out on first, sacrifice bunt. Regan safe bunt to first, stole second. Ball came home, Pettit out on fly. Score 6-1.

Fifth innings: Wetaskiwin, Pitman, safe to first; Gouchee, safe to first; Pitman out by Winchester, L. Murray safe to first, Walcott out on second, Phellon fanned.

Strathcona: Dresser, first by hit; Allen first on balls, Wylie safe to third, L. Murray to third on error. Allen home, Wylie home on overthrow ball. Ball to first on hit, McKerricker fanned, Dobson safe to first, stole second. Ball home, Winchester safe to first, Dobson home, Regan out by Martin. Pettit out by foul fly.

Sixth: Wetaskiwin, Barrett out on first, S. Murray out by fly, Mar-

tin safe to first, out on third, Dahl fanned.

Strathcona: Dresser, safe to first, stole second, Wylie first, error of Dahl, Ball fanned, Allen caught out, Dresser out on second.

Seventh: Wetaskiwin, Pitman out on first, Gouchee caught out, S. Murray caught out.

Strathcona: McKerricker out by Barrett, Winchester fanned, Dobson out.

Eighth: Wetaskiwin, Walcott, first, Phellon caught out, Barrett first, Walcott home, S. Murray out on first, Barrett home, Martin hit to third, Dahl fanned.

Strathcona: Regan safe to first, Pettit safe to first, Dresser fanned, Regan home, Allen safe to first, stole second, Wylie second, Pettit home, Allen home, Ball out on first, McKerricker fanned.

Ninth: Wetaskiwin, Pitman safe to first, Gouchee out on foul fly, L. Murray caught out, Walcott out on first.

Score, 15-3; innings to spare for Strathcona; time, 2 hours; umpire, Garretson, of Edmonton.

### Souris Team Leaves

For Montreal To-day

Will go Against the Shamrocks Old

Gard in Effort to Bring Minto

Cup West

Souris, Man., June 26.—The Souris lacrosse team, champions of the North-west, left today for Montreal, where they will tackle the Shamrocks in a series of games for the Minto cup. The local team is practically invincible in this part of Canada and includes some of the best players ever seen west of the Great Lakes. From the form they have shown this season it is expected they will make a very creditable showing in the east and many feel confident they will return with the much-coveted cup. The first game of the series will be played on Monday next.

The Shamrock lacrosse team decisively defeated the Nationals on National grounds last Saturday by eight to three. Shamrocks are the same old bunch, with Kavanagh in goal, and the two Brennans on the home and Hogan at inside. The team shows in splendid form and are confident of holding the cup this year. Not much money is up in Winnipeg.

### EDMONTON TEAM GOES SOUTH.

The Edmonton ball team left for the south this morning to play three games in Calgary. The team is as follows: Vining and Grady, battery; Dobson first, Deton second, Barry third, Simons s.s., Maloney centre, Till left, Cronn right. In Calgary they will be met by Brennan, catcher, from Melita, who is known all over the west as a man with the right kind of a salary mit, and Nutt, from Toronto, a pitcher with a deceiving bend. Edmonton will be there with a star aggregation, which is only handicapped by the fact that they have had no chance to work together yet. About fair time it will be safe betting.

### LACROSSE IN STRATHCONA.

The Strathcona lacrosse team has a game on this evening with a picked team from the two Edmonton teams. The game is an exhibition one, preparatory to the games to be played here next week. The Edmonton team will be picked from the following players: Leggett, Glass, Morris, Leask, McQueen, Blewett, Sheppard, Bolander, McLaughlin, Banford, Powers, Bristow, Mellon, Thompson, Anderson, Watkins, Thompson. The game will start at 7.15, the bus for the other side leaving the Senate cigar store at 6.45. All the players are requested to bring in their sweaters.

### ANOTHER SHERRING.

Dr. Claude Freeman, a Hamilton man, is a rival of William Sherring, the Marathon victory. In a letter home he says that at the international races held at Chen Tu, China, he won the running races. There were competitors from many nations. Dr. Freeman is a brother of Mrs. Buchanan, wife of W. A. Buchanan, of the Lethbridge Herald, late of the Toronto Telegram.

### COPPER-NORTHERN BALL.

Tuesday's games: Calumet 4, Winnipeg 1; Fargo 6, Houghton 1; Hancock 2, Duluth 0; Lake Linden 11, Grand Forks 0.

## A Corset Bargain
